

## MYB/CCP6 FISH Probe Kit

### Introduction

The MYB/CCP6 FISH Probe Kit is designed to detect the human MYB gene located on chromosome band 6q23.3, along with the number of chromosome 6 copies per cell. Rearrangements and abnormal expression of the MYB gene – also known as efg, Cmyb, c-myb or c-myb\_CDS – have been observed in acute and lymphoid leukemias, colorectal, breast and other solid tumors and malignancies.

### Intended Use

To measure the copy number of the human MYB gene located on chromosome band 6q23.2.

### Cont.

LSP MYB FISH Probe  
CCP6 FISH Probe

### Color

CytoOrange  
CytoGreen

### Probe Design

Not to Scale

LSP MYB FISH Probe covers a chromosomal region which includes the entire MYB gene. CCP6 FISH Probe, derived from chromosome 6-specific alpha satellite DNA, is designed to serve as a control to determine the number of chromosome 6 copies per cell.

### Cat. No.

CT-PAC018-10-OG

### Volume

10 Tests (100 µL)

### Signal Pattern Interpretation

#### Normal Patterns

202G

#### Abnormal Patterns
