

VHL/CCP3 FISH Probe Kit

Introduction

The VHL/CCP3 FISH Probe Kit is designed to detect the human VHL gene located on chromosome band 3p25.3, along with the number of chromosome 3 copies per cell. Abnormal expression of the VHL gene – also known as RCA1, VHL1, pVHL or HRCA1 – has been observed in kidney cancer and other hereditary and somatic conditions.

Intended Use

To measure the copy number of the human *VHL* gene located on chromosome band 3p25.3.

CytoGreen

Probe Design

Not to Scale

LSP VHL FISH Probe covers a chromosomal region which includes the entire *VHL* gene. CCP3 FISH Probe, derived from chromosome 3-specific alpha satellite DNA, is designed to serve as a control to determine the number of chromosome 3 copies per cell.

Cat. No.

CT-PAC015-10-OG

Volume

10 Tests (100 µL)
